If you're on a tight budget and your health insurance won't help you purchase a new wheelchair, you may be tempted to buy a used wheelchair. However, you'll want to make sure the wheelchair is in working order before committing to the purchase. Make sure the tires are still functional, the upholstery is still in good condition, and the chair fits your body comfortably.

Manual wheelchairs are operated by the user, or by someone pushing the wheelchair from behind. These wheelchairs are not powered by a battery and must either be driven by the handles on the wheels or by having someone to assist you by pushing on the handles behind the back of the chair. These wheelchairs also come with brakes, usually at the back of the chair and on both sets of wheels, to ...

However, the "nearly" comes into play in my manual wheelchair, which it does not fit. I have circular and padded armrests on my Greencare manual wheelchair, and the holder is just not designed for circular armrests. It needs flat shelf armrests to fit and to be sturdy. Which I think is why a lot of people were tripped up by this. But it is called Nearly universal for a reason, and I think that ...
