Merely said, the campus network for high availability design guide cisco is universally compatible taking into consideration any devices to read.

[Campus Network For High Availability](#)

Campus network devices can currently provide a high level of availability within the individual nodes. The Cisco Catalyst 6500 and 4500 switches can support redundant supervisor engines and provide L2 Stateful Switchover (SSO), which ensures that the standby supervisor engine is synchronized from an L2 perspective and can quickly assume L2 forwarding responsibilities in the event of a ...

[Campus Network Design Guideline - Cisco Community](#)

The high stratum campus network, shown in the diagram above, is taken from the standard Cisco Campus network design and contains three components. The campus core consists of two Layer 3 devices labeled CB-1 and CB-2. The server component, located in the lower section of the figure, has two Layer 3 routers labeled SD-1 and SD-2. The remaining devices in the server block are Layer 2 devices. In ...
