That's when clinical trials become important, but that also should be part of the pathways. Those patients should be referred for a clinical trial when they meet certain criteria. I think physicians want to be autonomous, they want to think on their own, but in reality, we want to standardize care where every patient's treated the same based on the NCCN guidelines, which is the highest quality ...

[Glioblastoma | MD Anderson Cancer Center](#)

Quickly thereafter, clinical trials began for cancer and infectious disease vaccines, wherein plasmid was introduced via electroporation or injector gun. With DNA based vaccines, the plasmid must be delivered to the nucleus of the host cells to induce antigen expression and the resulting immune response. Shortly after DNA vaccines were identified, mRNA-based vaccines were developed . In ...
