Adam, Eve and Noah vs Modern Genetics. by Dr Robert W. Carter. Published: 11 May 2010 (GMT+10) The evolutionary map of world migrations is startlingly close to the biblical account of a single dispersal of people from Babel. The evolutionary "Out of Africa" theory tells us there was a single dispersal of people, centered near and travelling through the Middle East, with three main ...

Population genetics is intimately bound up with the study of evolution and natural selection, and is often regarded as the theoretical cornerstone of modern Darwinism. This is because natural selection is one of the most important factors that can affect a population's genetic composition. Natural selection occurs when some variants in a population out-reproduce other variants as a result of ...
