My point of comparison was Physics, Walker (4th edition) which is currently our main textbook for the our non calculus Physics courses. I compared the contents in detail, and found almost 100% overlap with a couple of sub topics missing. Actually, the sub topics that were missing I believe should be taught in a calculus based physics course (e.g. Gauss's law).

In physics, spacetime is any mathematical model which fuses the three dimensions of space and the one dimension of time into a single four-dimensional manifold. Spacetime diagrams can be used to visualize relativistic effects, such as why different observers perceive differently where and when events occur.. Until the 20th century, it was assumed that the 3-dimensional geometry of the universe ...
